

Architecture Core

```
graph TD; AC[Architecture Core] --> SA[Subsystem A]; AC --> SB[Subsystem B]; SA --> SI[Shared Interface]; SB --> SI;
```

The diagram illustrates a hierarchical and interconnected system architecture. At the top level is the 'Architecture Core'. This core branches out to two parallel components, 'Subsystem A' and 'Subsystem B'. Both subsystems then converge into a single 'Shared Interface' at the bottom level. The flow is indicated by curved arrows pointing downwards from the core to the subsystems, and then from the subsystems to the shared interface.

Subsystem A

Subsystem B

Shared Interface
